

Solution spotlight | Services for e-billers

Kingdom of Bahrain | 14 June 2020

The current pandemic, fuelling a 'go digital' wave, has seen the emergence of a new breed of companies that facilitate payments by consumers to retailers. Consumers - hampered by a combination of government restrictions and an unwillingness to venture outside – have been empowered to make, and stay up-to-date with, payments. However, e-biller services can expose businesses and their users to potentially serious information security and business continuity risks.

Questions that should be asked by on-line consumers – and must be answered by service providers – include:

Contact us:

Srikant Ranganathan

How secure is it?

- How can e-billers ensure that software will not be attacked by malicious actors?
- Has security architecture been reviewed?
- What about vulnerability assessments and penetration testing?

Is card data stored, processed or transmitted?

- Is the e-biller PCI-DSS certified?
- Is PCI DSS certification up-to-date?
- Are compliance activities on-going?

Is it disaster-proof?

- Can operations continue during a crisis?
- Is the e-biller's business continuity strategy aligned with leading practice?

COVID-19's impact requires a fundamental re-think of a range of critical operations. Contact our market-leading IT consulting team for more information on our services for e-billers.
