

Solution spotlight | Learning Point

Kingdom of Bahrain | 12 January 2021

Institutions have to operate in a dynamic environment. Both requirements and the people who deliver keep changing. To deliver consistent quality, organisations must ensure that business requirements and leading practice are continuously communicated to stakeholders. Learning and continuous education programmes are a cornerstone to achieving those goals. Keypoint has developed an eLearning platform based on the latest technology that can be used to deliver industry-leading training and knowledge courses to all stakeholders across your organisation.

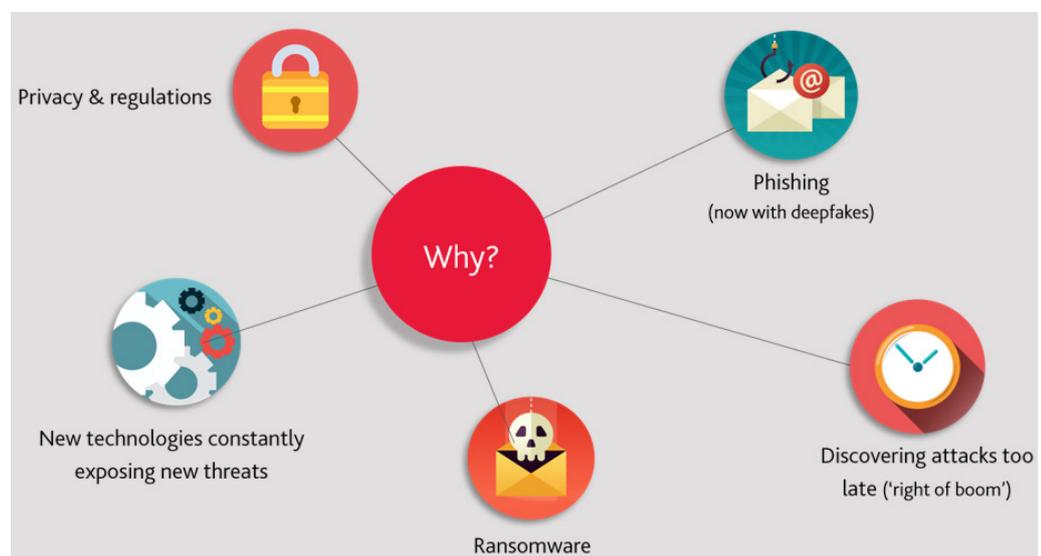

As technology evolves and with the prevalence of internet, social media and mobile technology, eLearning - learning using technology as a platform - has become an industry standard. eLearning provides a learning environment that is both consistent and personal and - when done properly - is increasingly interactive, enabling two-way communication between users and instructors.

Keypoint's simple yet powerful e-learning platform delivers quality learning opportunities on the go. We offer both cloud-based (hosted at Keypoint's data centre) and on-site arrangements. We also provide on-site learning, customised with clients' branding - including logos and corporate colours.

Content

Learning Point can host a virtually unlimited range of training courses. We have developed some industry-standard training courses that can be pre-configured on Learning Point, such as:

- Foreign Account Tax Compliance Act (FATCA) awareness
- Anti-money laundering (AML) training
- Know your customer (KYC) awareness
- ISO 22301-aligned business continuity management awareness
- ISO 27001-aligned IT security training
- IT governance training
- Cyber-security awareness

Your success is our business

We also work with clients to develop customised courses that meet their unique requirements. These courses are developed in consultation with organisations and then deployed on our eLearning platform.

Key features

Our proprietary training solution:

- Is based on an industry-leading open source learning platform
- Offers a fully customisable user interface
- Allows users to customise both course content and settings, such as:
 - Number of attempts allowed to pass tests
 - Time allowed to complete a module or course
 - Access times
- Reports on each user and their activities

Benefits of Learning Point

Our eLearning solution provides significant advantages, including:

- High quality pre-configured training
- Customisable to your organisation's requirements
- Holistic learning management process (registration, training, evaluation and monitoring)
- Supports training and awareness for regulatory compliance
- Supports content in multiple languages including English, Arabic and French
- Cost effective – with one-time licensing and pay/use options

Selected credentials

Learning Point:

- Is used at Keypoint for all our learning and development needs
- Has been used for FATCA training for a large international Islamic banking group based in Bahrain
- Is deployed for global FATCA training for a large international bank based in Bahrain with operations in Europe, the Americas, the Middle East and North Africa
- Has been deployed at a large regional bank based in Bahrain for business continuity training
- Is being used for AML/CFT awareness for a leading credit card service provider
- Has been deployed at an oil & gas-focused holding company for data protection awareness
- Has been used for AML/CFT awareness for various real estate-related businesses

Why Learning Point?

- Our fully-customisable eLearning solution offers you a fully scalable, flexible training solution
- Learning Point can be delivered as a fully-loaded training library - or as virtually endless empty shelves
- Learning Point allows organisations to seamlessly deliver consistent training to staff working in - and away from - offices
- Learning Point is cost-efficient with a number of different usage models
